

# WESTMORELAND STATE PARK

SATURDAY, JULY 16TH

## BIOBLITZ

12:00 p.m.- 4:00 p.m.

Westmoreland State Park is hosting a BioBlitz event in which visitors and park staff will focus on finding and identifying as many species as possible in specific areas of the park. We welcome all families, kids, adults, students, teachers, scientists, naturalists, and volunteers to help us develop a snapshot of the biodiversity living here.

**We will be looking at the following areas within the park: Big Meadow Trail, Rock Spring Pond Trail, Turkey Neck Trail, Red Fox Trail, Laurel Point Trail, and the gardens beside the Discovery Center and Visitor Center.**

Participants should arrive and meet at the Discovery Center where they can sign up for a specific location to work in at the welcome tent. Participants will then begin hunting for wildlife to observe, photograph, and record via iNaturalist and Seek (a free app).

Please bring water, snacks, binoculars, field guides, smart phones, etc.
